TRT as a response to the Review

TRT is built on our previous Tools and Resources Development Fund (TRDF), responding to the recommendations of BBSRC's review of technology development in the biosciences

Scope of TRT

TRT

TRT's role is to pump-prime the next generation of tools, technologies and resources required by bioscience researchers in scientific areas within our remit.

TRT funds early-stage projects with high transformative potential.

Transformative Technologies

What makes a technology transformative?

- Revolutionising fields
- Solving challenges
- Democratising research
- Boosting productivity

Scope

Technology development with transformative potential in a broad or narrow field within the biosciences

Proof-of-concept with a clear trajectory towards a new technology

Step-change to state-of-the-art in accuracy, precision, resolution, throughput, breadth of application

Computational methods
Modelling techniques, AI and statistical techniques

Bioinformatics tools
Software to enable visualisation, analysis, exploration, investigation of biological data

Out of scope

Generically applicable to research domains outside the biosciences

Improvement of technologies where a proof-of-concept has been demonstrated

Technologies for translational applications
As opposed to discovery research

Exceeding cost or duration
£225,000 at 80% FEC for 6 to 18 months

Answering a research question instead of developing technology

Medical or clinical devices
And healthcare technologies

Large scale infrastructure

Community databases and data infrastructure (BBR funding)

Resubmissions Or currently reviewed by another funding body

24TRT

Application and Assessment process

Applying to 24TRT

Focus on the expertise and experience required to demonstrate capability to deliver the proposed project.

Interdisciplinary collaborations are encouraged. For example, a project could follow a problem owner/ solution provider approach.

Standard BBSRC eligibility rules apply.

Research Technology Professionals (RTPs)

BBSRC recognises the talent for innovation, expert knowledge and technical competence that RTPs possess.

RTPs are eligible to apply to our funding opportunities as project lead/ co-lead.

BBSRC particularly supports the provision of relevant training and upskilling opportunities beneficial to the success of the project.

Timeline

Fast track assessment process

Proposal assessed and scored by three panel members with relevant expertise

Interdisciplinary panel-wide discussion of proposals

Panel meeting to produce funding recommendation

BBSRC will make the final funding decision

Demand management

We are expecting significant demand for this opportunity.

Consider carefully whether your application is within the remit and scope and clearly articulate this in your application.

You can only be Project Lead on one application, but still be a member of a consortium on multiple applications.

Assessment criteria

Vision

Focus on the idea and its transformative potential

Approach

Focus on the delivery

Applicant and team capability to deliver

Resources and cost justification

Ethics and responsible research and innovation

Trusted Research and Innovation (TR&I)

UKRI is committed in ensuring that effective international collaboration in research and innovation takes place with integrity and within strong ethical frameworks.

All applicants must consider the Trusted Research & Innovation question on the UKRI Funding Service when applying to this call.

Where relevant, we will ask you for additional information concerning TR&I after your application is deemed to be eligible for this call.

See [further guidance and information about TR&I](#), including where you can find additional support.

Guidance for Applicants using TFS

The online guidance for applicants using the UKRI Funding Service (TFS) gives an overview of:

- how to create your Funding Service account
- how to apply to a funding opportunity using the service
- new functionality in development
- where to get help and support using the service

You can also watch videos demonstrating the service.

The screenshot shows the UKRI Funding Service interface. At the top, there's a navigation bar with 'UK Research and Innovation' logo, 'Home Applications Reviews', and a user profile 'Jane Doe'. Below this is a purple banner for 'Funding Service' with a 'BETA' notice: 'This is a new service – your feedback will help us to improve it.' A link for 'Back to applications' is visible. The main content area is titled 'APP101791: test' and 'Application overview'. There are two buttons: 'Write application' and 'Read application'. A progress bar indicates '45% complete'. Below the progress bar is a table of sections:

Section	Status
1. Details	Complete ✓
2. Applicants	Complete ✓
3. Resources and cost	Incomplete ✎
4. Case for support	Complete ✓
5. Related applications	Complete ✓
6. Research team and capability to deliver	Incomplete ✎

On the right side, there are details about the application:

- Opportunity:** OPP126: NC3Rs Project Grant Full 2022
- Application reference:** APP101791
- Applicant:** Jane Doe
- Application deadline:** Wednesday 30 November 2022, 4:00pm
- Funder(s):** MRC
